

Michael Badejo

Senior Frontend Engineer

thecodermikel@gmail.com | devmichael.netlify.app | github.com/Badejomichael | Nigeria

PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years of experience building production-ready web applications with React and Next.js. Specializes in performant, mobile-first interfaces with a proven track record of owning features end-to-end and architecting scalable frontend systems. Adept at working cross-functionally with design and product teams to ship polished, high-quality user experiences on time.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks	React, Next.js, Tailwind CSS, Framer Motion, Recharts
Architecture	Component design systems, Redux, React Context API, performance optimization, mobile-first development
Web3 & APIs	Wagmi, RainbowKit, Ethers.js, WalletConnect, Solana Web3.js, RESTful APIs, Supabase
Tooling	Git, GitHub, Vercel, Figma, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

TheCanvas & Mysticsverse

2025 – Present

Lead Frontend Engineer (Contract)

- Architected and shipped high-traffic frontend infrastructure serving thousands of concurrent users globally, owning the full product from design system to production deployment.
- Engineered a custom real-time validation engine achieving zero downtime under peak load, reducing error rates across all critical user flows.
- Built a complex interactive asset mixer with dynamic state management enabling instant, zero-latency preview of thousands of asset combinations.
- Improved mobile-first performance and accessibility scores across all decentralized applications, reducing interaction friction significantly.
- Collaborated with stakeholders to translate branding and product requirements into scalable, production-ready component systems.

Tech: Next.js · TypeScript · React · Wagmi · RainbowKit · Framer Motion · Tailwind CSS

SELECTED PROJECTS

EarnID

[Live](#) | [GitHub](#)

On-chain income verification for Africa's 35M+ freelancers — minting tamper-proof credentials as Solana NFTs. Built for Superteam Nigeria.

- Architected a full-stack product end-to-end with auth, RLS-protected database, blockchain integration and a 0-100 trust score algorithm.
- Integrated Solana Web3.js for on-chain NFT minting with QR code sharing and public verification requiring no login.

Tech: Next.js · TypeScript · Supabase · Solana Web3.js · Tailwind CSS · Framer Motion

Zarflow

[Live](#) | [GitHub](#)

Finance dashboard with role-based access control, real-time data visualization and complex state management.

- Built role-based UI (Admin/Viewer) with zero UI leakage, interactive Recharts visualizations and a dynamic Insights engine.

Tech: Next.js · TypeScript · React Context API · Recharts · Tailwind CSS · Framer Motion

KalshiForge

[Live](#) | [GitHub](#)

Prediction market simulation platform with financial-grade UX, real-time probability inputs and cross-device responsiveness.

- Built a dynamic simulation engine with real-time state management and Recharts-powered financial dashboards.

Tech: Next.js · TypeScript · Recharts · Framer Motion

ClaimFlow

[Live](#) | [GitHub](#)

Web3 airdrop dApp with multi-step transaction flows, wallet connection and conditional eligibility verification.

- Implemented Wagmi and RainbowKit wallet connection with robust error handling and accessible loading states.

EDUCATION

B.Eng. Computer Engineering | University of Benin, Nigeria
